

ELANG RECON VEHICLE 4x4

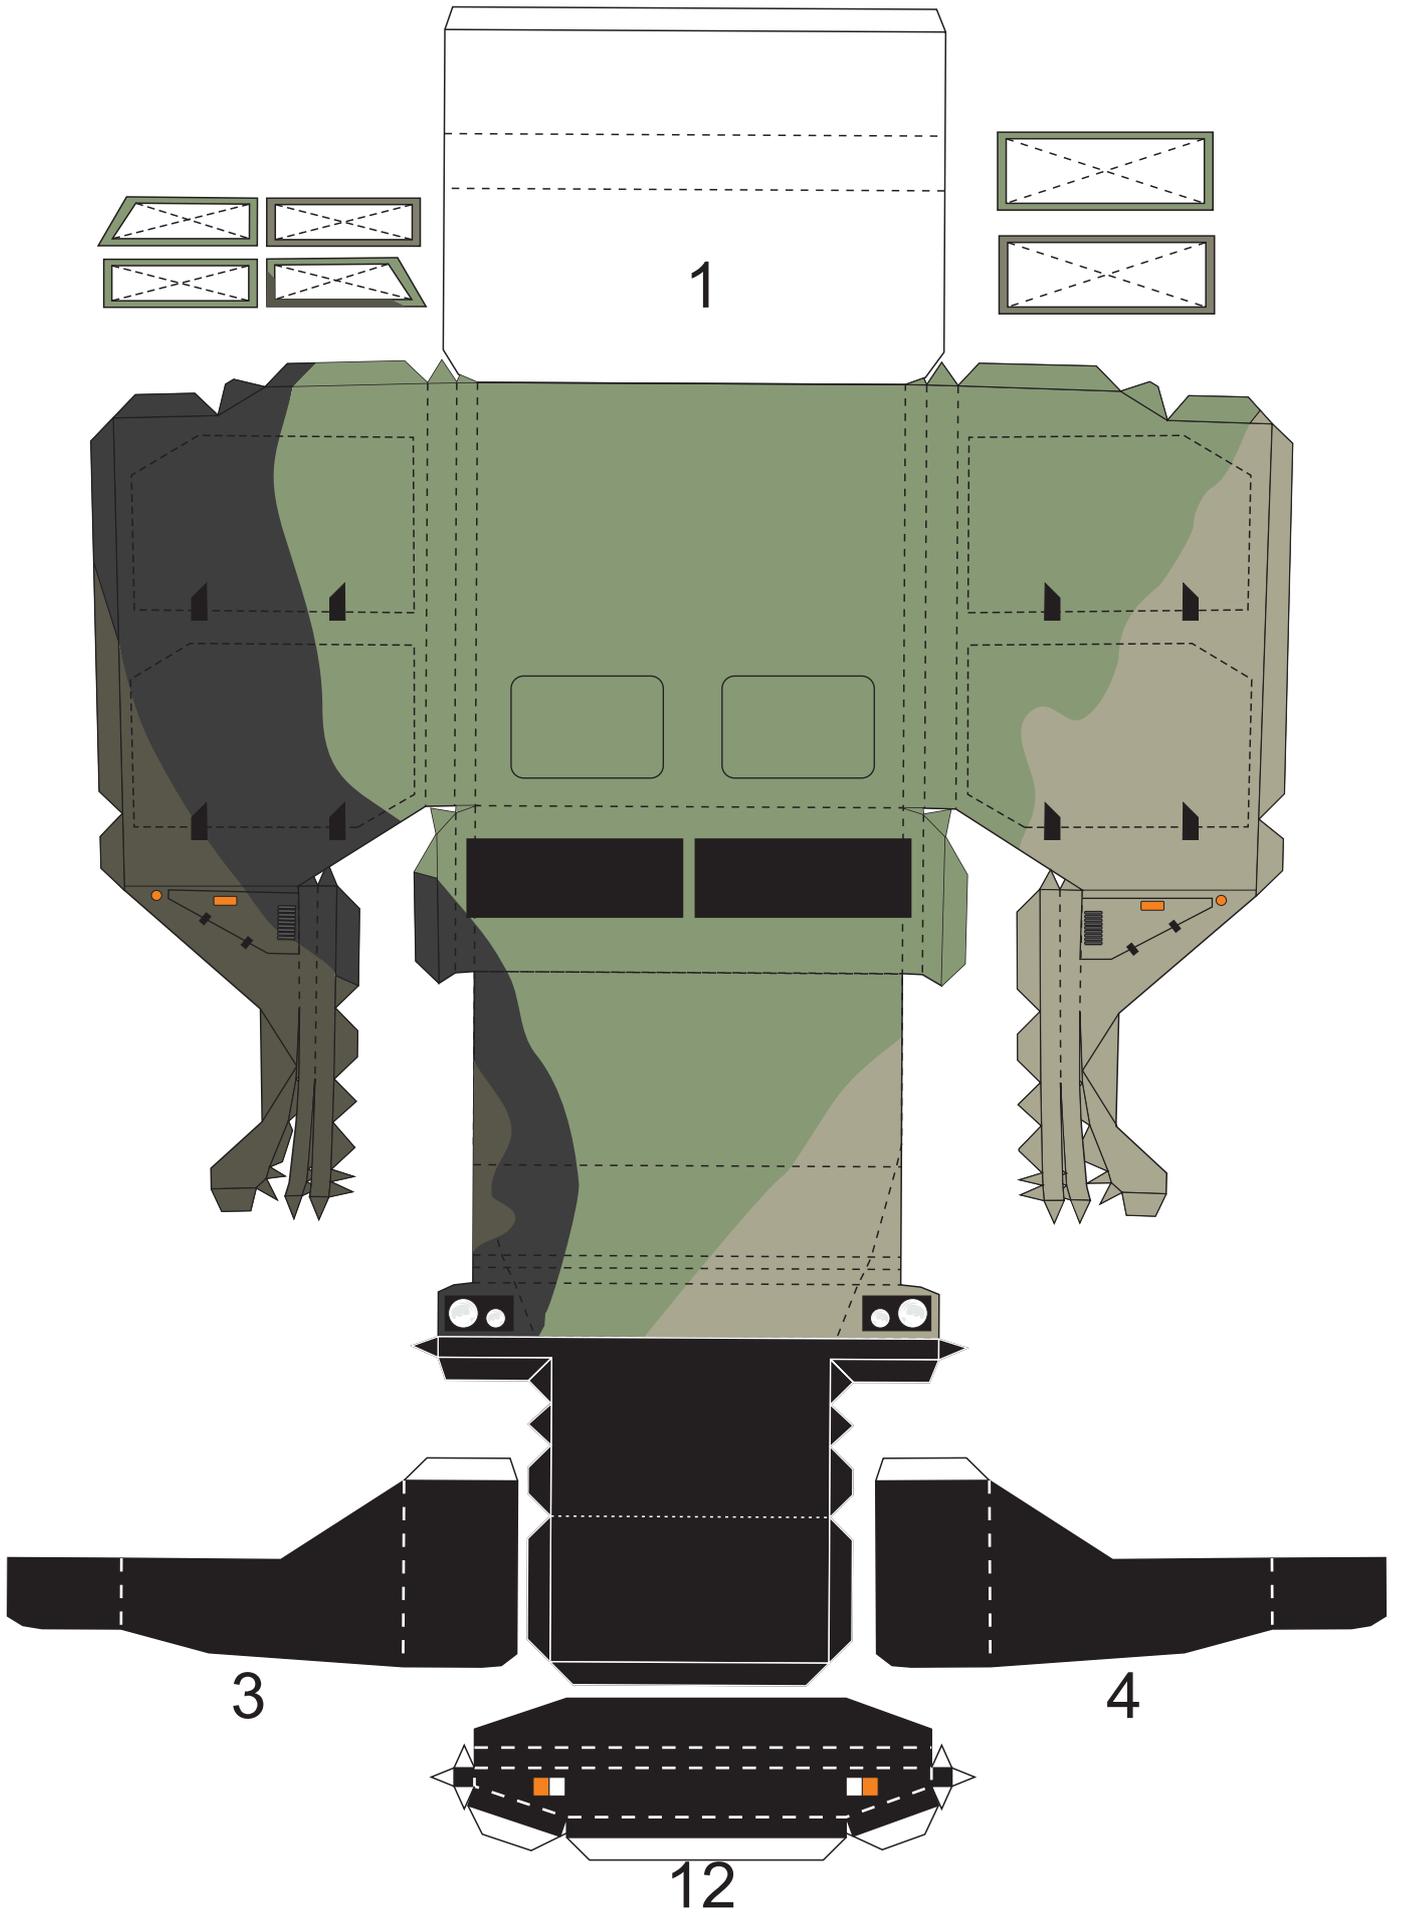

1:300

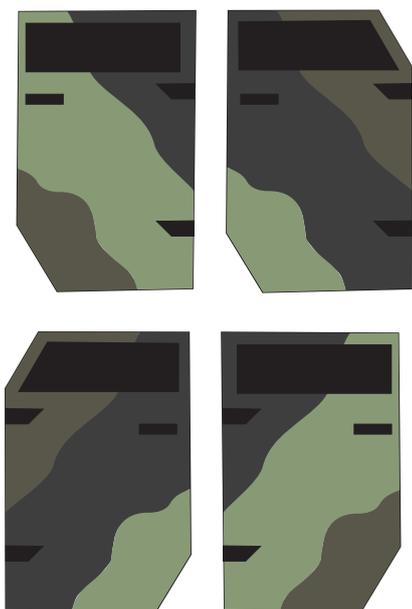

Elang Recon tactical vehicle is actually based from Sherpa made in France, which is planned to be in production by Pindad with slight modifications. These vehicles will be used as a military reconnaissance vehicles.

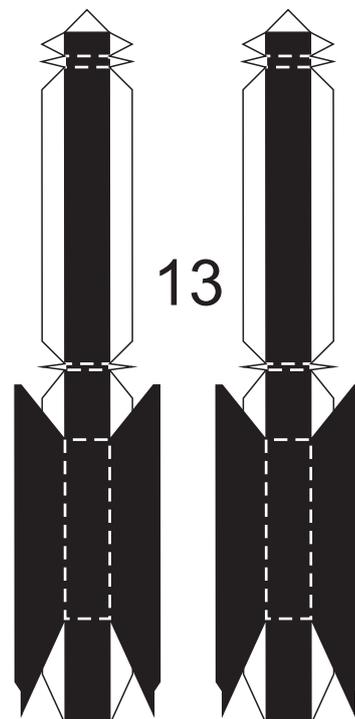

Pindad choose Sherpa basis, because one of the requirements of users (TNI) is a reconnaissance vehicle that has the capability of protection to STANAG III (equivalent with Anoa). And can be developed up to STANAG V.

Although Sherpa payload of up to 4 tons. Excess payload is not intended to carry the goods, but to be able to handle the weight of armor protection will be thicker and heavier body.
